

AVIATION FUEL TYPE B

CHARACTERISTICS

Hose constructed around a mandrel with interior in NBR black rubber, textile reinforcement of high tenacity and braids for electro-static discharges. The outer layer is of synthetic rubber in a smooth black colour, which is hydrocarbon, weather, ozone and abrasion resistant.

APPLICATIONS

Ideal hose for pumping aviation fuels with a maximum aromatic content of 30%. Manufactured subject to regulation **BS EN 1825:2011 Type B**.

TEMPERATURES

From -25°C to +70°C.
