DUAL TUBE

CHARACTERISTICS

Double hose with perfect adherence between both due to joined extrusion. Manufactured in EPDM rubber for the black interior of both hoses, and EPDM/SBR rubber for the blue and red exteriors, which provides abrasion resistance. Interior reinforcement with synthetic thread of high tenacity.

APPLICATIONS

Ideal hose for welding, oxygen cutting and similar techniques in industry, shipyards and construction. Manufactured under standard ISO3821.

TEMPERATURES

From -20°C to +80°C
