

REINFORCED PHARMAPRESS

CHARACTERISTICS

Very light and flexible translucent hose, constructed with thermoplastic elastomers and reinforced with polyester string and stainless steel spiral.

APPLICATIONS

Ideal hose for the transport of cosmetic, food and pharmaceutical products. Fruit juices, vinegars, alcohols with a maximum alcohol strength of 96%, creams, soaps and aromas. Resistant to products with oil and fat content in accordance with EU 10/2011. Complies with FDA regulation and USP class VI pharmaceutical standards.

TEMPERATURES

From -30°C to +125°C. SIP cleaning is not recommended as this can reduce the durability of the hose.
