

# TRICOESPIR

Hoses for gardening

## CHARACTERISTICS

Anti-torsion four layer hose manufactured through extrusion of vinyl compounds, yellow outer layer and black interior layer. Internally reinforced by a polyester knit mesh covering that prevents torsion and folding during use. Highly flexible and manageable. Non-toxic. Ca/Pb/Ba free. Resistant to atmospheric agents and chemical products.

## APPLICATIONS

Ideal hose for gardening irrigation, horticulture and floriculture. Domestic installations and transport of water in general.

## TEMPERATURES

From -10°C to +60°C.
