

TRICOVINIL ROJA

Hoses for gardening

CHARACTERISTICS

Transparent red/orange hose made by coextrusion of vinyl compounds, reinforced on the interior by a knitted polyester thread mesh to withstand pressure of up to 7 bar and provide resistance against breakage when stretched. Very flexible and easy-to-handle. Non-toxic but not suitable for food use. Ca/Pb/Ba free. Resistant to atmospheric agents and chemical products.

APPLICATIONS

Ideal hose for gardening, horticulture and flower irrigation.

TEMPERATURES

From -10°C to +60°C.
