

SMOOTH PTFE WITH STAINLESS STEEL MESH

CHARACTERISTICS

Hose with interior layer of smooth teflon, fire-resistant and chemically inert, and exterior layer of 304 stainless steel mesh.

APPLICATIONS

Ideal hose for the transport of corrosive chemical, food and pharmaceutical products as well as for the passage of steam, cryogenic gas unloading and air compressors. Apt for food use in accordance with FDA standards.

TEMPERATURES

From -70°C to +260°C.
